

BURNER SERVICE THROUGHOUT THE ENTIRE LIFE CYCLE.

- ✓ Increased efficiency and extended life for your combustion system
- ✓ Optimal functional reliability with our service
- ✓ Sustainability and cost-efficiency for your company

SAACKE SERVICE: EXCELLENCE IN EVERY STEP

Here at SAACKE, we pursue a clear goal: We maximize the service life of your combustion system to ensure that you **benefit from a reliable and high-performance plant**. We increase the efficiency of your burner with targeted optimizations and modernizations, updating it to reflect the state of the art of the technology. With our **extensive offering of safety-relevant spare parts**, we additionally guarantee you optimal functional reliability and smooth operation.

Reducing costs and protecting the environment: we put our many years of professional experience and expertise to good use for a more sustainable design of your combustion system infrastructure. For you, this means: you save operating costs and reduce your ecological footprint at the same time!

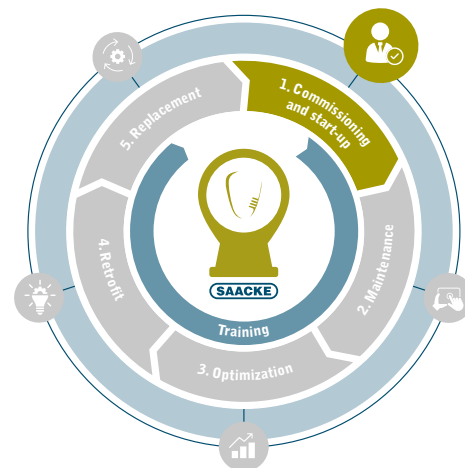

1. COMMISSIONING AND START-UP

Our services

- ✓ We review your installation and commissioning documents thoroughly and ensure a smooth start to operation for your combustion system.
- ✓ Our experienced SAACKE staff train your team on site to ensure you can operate your plant safely and reliably.
- ✓ Thanks to our professional supervision, we can guarantee you that every phase of the installation and commissioning is performed in accordance with the highest standards.

Our inspection, maintenance and service packages provide you with a worry-free package.

The added value for you: maximum transparency

You benefit from a professional start of operation with precise documentation of all performance data. This provides you with the certainty that the starting situation is clearly documented and easily traceable.

2. MAINTENANCE.

Our services

- ✓ Our inspection, maintenance and service packages extend the life of your combustion system and ensure its long-term, optimal performance.
- ✓ We ensure the reliable operation of your plant through regular maintenance, the supply of consumables and the on-time replacement of wear parts.
- ✓ We check and implement safety-relevant spare parts to ensure the maximum safety and reliability of your plant.
- ✓ Our online monitoring service enables us to detect developing wear at an early stage and implement corresponding measures in good time so as to avoid any malfunctions or disruptions.
- ✓ Our help desk and 24-hour emergency support (including online) offer you immediate assistance in the case of faults.

The added value for you: reliable efficiency

You benefit from consistently high performance parameters, which ensure that your plant is available and ready for operation at all times.

3. OPTIMIZATION.

Our services

- ✓ We provide you with precise performance data for you combustion system.
- ✓ We optimize the mode of operation individually by adapting the controller data to increase the efficiency of your system immediately (including online).
- ✓ We targeted to improve your measuring technology to guarantee more reliable plant control.
- ✓ We retrofit your plant with a modern O₂ control to reduce the energy consumption.
- ✓ Our training and refresher courses will keep your plant operators fit on the optimal operation and running of your plant.
- ✓ We offer you advice and recommendations for products on compliance with legal emission and safety standards.

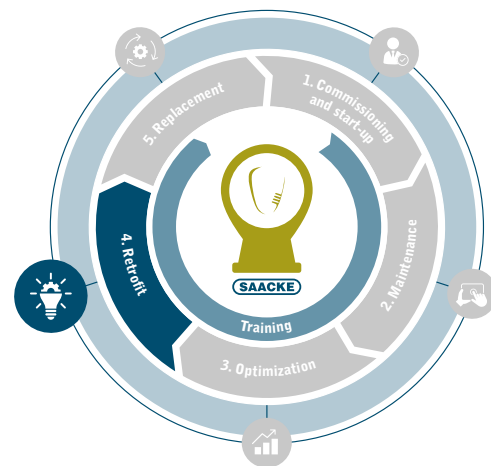

The added value for you: a long-lasting, future-proof solution

You benefit from the higher productivity of your plant and lower emissions at the same time thanks to improved performance data and increased performance.

4. MODERNIZATION.

Our services

- ✓ We targeted to identify and evaluate modernization options for you with the aim of further optimizing the plant performance.
- ✓ We modernize your control and combustion system, thus enabling the use of additional or alternative fuels – for more flexibility and efficiency.
- ✓ With our modernization packages, we replace parts which are obsolete or no longer available.
- ✓ We implement your requirements efficiently and with minimal cost and time exposure to protect your investment.

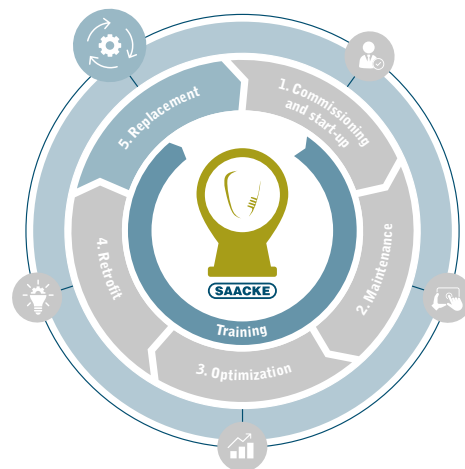

The added value for you: sustainable operation

You benefit from long-term protection of your initial investment and active support in case of obsolescence of components, to extend the product life cycle of your plant.

5. REPLACEMENT.

Our services

- ✓ We offer you comprehensive advice even before the quotation phase in order to make the best system decision for your needs.
- ✓ We proactively recommend upgrades or adjustments to you so that your combustion system always comply with the current regulations.
- ✓ We recommend practical replacements for optimal process performance so that you can make your processes CO₂-neutral.
- ✓ Together, we select the best possible technology for the optimal support of your updated processes.
- ✓ We support you in implementing new combustion solutions so that everything runs smoothly.

The added value for you: minimal risk

You benefit from our expertise as an experienced partner, who understands your requirements inside out and offers you customized and future-proof solutions.

WE ARE THERE FOR YOU WHERE YOU NEED US.
